- Options for OM3, OM4 and SM with LC and SC adaptors for up to 96 fibres
- Fully assembled and ready for installation

Technical Data:

Material	SPCC 1.5mm
Colour	Black
Dimensions	424 x 200 x 44mm

Product Overview:

The Maxxam Loaded Fibre Patch Panels have been developed to help save time and money when on site. The panels are supplied with the adaptors installed in to the front plate and the front plate mounted on to the panel chassis. The 19" mounting brackets are also fitted to the panel chassis so that the panel is ready to be mounted in to the rack or cabinet. The panels are supplied with cable glands, bunny clips and splice cassettes and any unused ports are fitted with blanking plugs.

The fibre panels are available with OM3, OM4 or SM adaptors and are configured for 8 to 96 fibres with LC adaptors or 8 to 48 fibres with SC adaptors.

Maxxam can supply a full range of fibre optic cables, pigtails and patch cords to provide a complete fibre solution.
